about us

MURAPLAST is the leading and most modern manufacturer of Polyethylene film in Croatia. It operates with 10.000 tons annual production capacity, 3 production halls with 6.300 m² production and storage place and employs over 80 persons.

Main product is extruded Polyethylene tubular blow film, which dependably on the buyers' request can be mono and 3-layers, various thickness and width, coloured and transparent, with print, and with specifically mechanical, thermal and others characteristics. Mainly for use for packaging in food and others industrial branches.

MURAPLAST can also produce industrial bags and have great assortment of shopping bags with different carrying handles and others products of similar use.

vision

To become great central European company with complete assortment of polyethylene products.

This project is funded
by the European Union

A project implemented
by the REDEA d.o.o.

buyers

MURAPLAST is strictly business 2 business oriented company and from the early beginnings it has adapted to the requests of its buyers and end users. MURAPLAST is present in Croatia in all bigger companies which deal with water and beer production and within other industrial branches which use polyethylene film as a wrapping material. MURAPLAST exports 40% of its products to Germany, Austria, Slovenia, Serbia, Bulgaria, Rumania and other countries.
